

Azkashine Job Portal — Pitch Deck

Format: This document is structured as a slide-by-slide narrative. Each section between --- separators is one slide. Designed to be converted to PowerPoint, Google Slides, Canva, or Marp/Reveal.js without rework.

Author: Nazir Hasan (PM) **For:** Azkashine internal + investor / partner conversations **Date:** 2026-05-11

Brand owner: Shaik Ishaq, Azkashine Software & Services Pvt. Ltd.

Conversion tips: - For **PowerPoint / Google Slides:** copy each section into a slide; the headline becomes the title, bullets become the body - For **Marp:** open this file directly — the --- separators are already Marp-compatible - For **Canva:** import as markdown via the Canva markdown import option, or copy section-by-section - For **Pandoc → PPTX:** `pandoc 01-pitch-deck.md -o azkashine-deck.pptx --reference-doc=template.pptx`

Slide 1 — Title

Azkashine Job Portal

Your Next Opportunity Is Just a Click Away

Connecting Potential Workers & Domain Specialists with Employers — in 10 Indian Languages.

Coming June 15, 2026

[ICON: Azkashine logo — apps/web/public/assets/logo.png]

Slide 2 — The Indian Workforce Today

300 million+ workers in India outside agriculture work in blue-collar and domain-specialist roles.

70% of India's new jobs by 2030 will be in these segments. — *McKinsey & Co.*

56% of Indian employers plan to hire in the second half of FY26. — *2026 Job Market Trends*

Tier-3 and Tier-4 cities are hiring fastest — **12–15% year-on-year growth** — yet remain underserved by existing platforms.

The opportunity is large. The current platforms aren't built for it.

Slide 3 — Where Today's Platforms Fall Short

Gap	What it means for workers
English / Hindi only	Workers from Tamil Nadu, Karnataka, Kerala, Odisha, West Bengal, Gujarat get a partial product or none
Text-heavy applications	Workers who think and speak fluently in their language struggle to compete on a typed resume
SMS-only notifications	Modern Indian workers live on WhatsApp; SMS gets lost in spam
Aadhaar friction at signup	Government-ID barriers turn workers away at the front door
Per-post pricing for employers	Casual / individual hirers pay premium prices designed for enterprises

We saw these gaps and built around them.

Slide 4 — Our Solution

A job portal designed for India — not adapted to it.

 **10 Indian languages from day one** — English, Hindi, Tamil, Kannada, Malayalam, Marathi, Gujarati, Odia, Telugu, Bengali.

 **Voice-first applications** — workers apply with a 2-minute audio message describing themselves. Their voice tells employers what a typed paragraph can't.

 **WhatsApp-native communication** — all status updates, interview reminders, and recruiter messages reach workers where they already are. WhatsApp open rates are 80%+ vs ~30% for SMS.

 **Phone-only signup** — workers register in under 60 seconds with just a phone number. No government ID. No paperwork friction.

 **Verified employers** — corporate employers are reviewed by our admin team before going live; AI-assisted content moderation catches scam postings.

Slide 5 — For Workers

Find work in the language you speak. In under a minute.

✓ Sign up with **just your phone number** (no government ID required) ✓ Browse jobs in your **10 language options** ✓ See **Recommended jobs** (based on your profile + location) and **Nearby jobs**

(sorted by distance) ✓ Apply with **text OR a 2-minute voice message** — your voice does the talking ✓ **Chat directly with employers** — text or 60-second voice notes ✓ **Easy interview scheduling** with WhatsApp + SMS reminders 24 hours and 2 hours before ✓ Available on **Android, iPhone, and web** — same features everywhere

Worker access is **free forever**. No premium tier in v1.

Slide 6 — For Employers

Reach verified workers across India. Pay only when you're ready.

✓ **Two registration paths:** Individual (instant approval) and Corporate (we verify your business documents) ✓ **14-day free trial** — full features, no payment required ✓ **Unlimited job posts** during your subscription ✓ **Audio + text applications** — get a richer signal than text-only platforms ✓ **Smart candidate management** — Accept / Reject / Bookmark, with sorting by experience and location ✓ **Schedule interviews** in three modes: In-person / Phone / Video ✓ **WhatsApp candidate communication** — your messages get read, not lost in SMS spam ✓ Available on **web and mobile** — review candidates from anywhere

Provisional pricing: ₹999 / month after the 14-day trial. *Final pricing pending Owner confirmation.*

Slide 7 — Built on Trust

Trust is the difference between a job board and a job marketplace.

 **Corporate employers verified** by Azkashine's admin team before going live (GST, CIN, business documents reviewed)

 **AI-assisted content moderation** — OpenAI's free moderation engine (strong on Indian regional languages) plus our own India-specific scam pattern detection

▶ **Job reporting** — workers can flag suspicious postings; admin reviews within 24 hours

🚫 **Active scam prevention** — we filter out classic patterns: "registration fees," MLM language, free-mail HR contacts impersonating real corporates, upfront-payment demands

 **Compliant by design** — DPDP Act 2023 aligned; RBI-compliant payment flows; manual renewal (no surprise auto-debits)

Slide 8 — How It Works

Wages are settled directly between workers and employers. **Azkashine never touches the money.** Our revenue is subscriptions only.

Slide 9 — Mobile + Web, Same Experience

Mobile App (React Native — Android + iPhone) - Worker app: full feature set, primary mode - Employer app: register, post jobs, manage candidates, chat, schedule interviews — full parity with the web

Web App (Next.js) - Same features as mobile, mobile-friendly responsive design - Admin dashboard is web-only (built for desk work, not the move)

One backend, three apps — Express + Prisma + PostgreSQL — workers, employers, and admins all on the same source of truth.

Slide 10 — Notifications That Actually Reach

Most platforms send SMS and hope. We send WhatsApp first.

Channel	When we use it	Why
WhatsApp Business	Application status updates, interview reminders, recruiter messages, payment confirmations	80%+ open rate in India; workers reply right in the app
In-app push (FCM)	All notifications, real-time	Free; native experience
SMS	OTP, payment confirmation	DLT-compliant fallback when WhatsApp can't deliver
Email	Password reset, employer-approval outcomes	Only when WhatsApp isn't appropriate

Cost benefit: WhatsApp templates are about 50% cheaper per message than DLT-registered SMS — and dramatically more engaging.

Slide 11 — Simple, Honest Pricing

	Workers	Employers
Free tier	Forever. Full access.	14-day trial. Unlimited posts.
Paid tier	No paid tier in v1	₹999 / month (<i>provisional</i>)
What's included	All features	Unlimited posts, candidate management, audio applications, WhatsApp notifications, voice messages in native languages
Renewal	N/A	Manual — you renew when you want. No auto-debit surprises.

Pricing is under final review with the Owner. The recommended option is presented above; alternatives are available.

What we will never charge for: - Per-application fees from workers - Per-post fees from employers (subscription includes unlimited posts) - Platform commissions on wages - Workers will never pay to apply

Slide 12 — Why Azkashine

Built in India. For India. By people who understand the workforce we serve.

1.  **Broadest language coverage** in the segment — 10 Indian languages from launch

2. 🗣️ **Voice-first design** — recognizing that India hires in speech, not in writing
3. 💬 **WhatsApp-native** — meeting workers where they already are
4. 🆓 **Workers stay free** — we monetize the employer side, not the worker who needs the job
5. 🇮🇳 **Local + compliant** — DPDP-aligned, RBI-aware, designed around how Indian SMBs actually hire
6. 📱 **Mobile parity for employers** — review candidates on the go; not just at a desktop

We're not a clone of Apna or Naukri. We're a focused alternative for workers and employers who got left out of those platforms.

Slide 13 — Team

Role	Person
Owner & Sponsor	Shaik Ishaq — Azkashine Software & Services Pvt. Ltd.
Product Owner / Acting PM / Frontend	Nazir Hasan
Backend Engineering	Asrar
Mobile Engineering	Dheeraj
Quality Assurance	Najeeb
Infrastructure & Hosting	Nayan
Operations + WhatsApp Owner	Shaik Ishaq

A small, focused team. No bloat. Every member is delivery-critical.

Slide 14 — Timeline

Date	Milestone
2026-05-11	Sprint 1 starts (today)
2026-05-12 to 24	Sprint 1: Auth, subscription module, FE/BE reconciliation, mobile + admin app skeletons, WhatsApp + DLT infrastructure
2026-05-25 to Jun 7	Sprint 2: Core flows — apply with audio, candidate management, chat, content moderation, English + Hindi UI
2026-06-08 to 14	Sprint 3: Bug fixes, performance, security audit, seed data, staging deploy
2026-06-14	Code freeze
2026-06-15	QA handover
2026-07-01 (target)	Public launch

6-week build window. Hard deadline. We're on track.

Slide 15 — What's Next

We are currently: -  All planning artifacts complete (Charter, PRD, RTM, Sprint Plan, DoD, Test Plan, Security spec) -  Engineering execution begins **today** -  Open conversations with employers for early-access partnerships -  WhatsApp Business verification process active

For partnership inquiries, early-employer access, or investor conversations:

 [Contact email]  [Contact phone]  [Website URL when live]

Azkashine Software & Services Pvt. Ltd. *Your Next Opportunity Is Just a Click Away*

Slide 16 (Optional — for investor decks) — The Ask

We are bootstrapping v1 to launch on **2026-06-15**.

Post-launch we will be looking for: - **Strategic partnerships** with corporate hiring teams (15–25 employers signed on at launch is the goal) - **Translation partnerships** to maintain the 10-language UI as the product evolves - **Distribution partnerships** to reach workers in Tier-3 / Tier-4 cities

We are not yet raising institutional capital, but conversations welcome.

Notes for the presenter

Brand colours: - Primary blue: `#5cc2ed` - Secondary teal: `#164e65`

Hero illustration: "Your Next Opportunity Is Just a Click Away" — already available in `apps/web/public/assets/`

When presenting: - Slides 2–3 set the market context - Slides 4–7 are the product pitch - Slides 8–10 are the "how it works" detail - Slides 11–12 cover differentiation and pricing - Slides 13–15 are team, timeline, and CTA

Slide-cut guidance for short pitches: - For a 5-min pitch: 1, 2, 4, 6, 11, 12, 15 (skip the deep-dive slides) - For a 10-min pitch: 1, 2, 3, 4, 5, 6, 8, 11, 13, 14, 15 - For a 15-min pitch: use all slides
